### **Maripol Silver Medallion worn by Madonna**

Madonna has just come out with her eleventh studio album, making this silent auction item even hotter-- a silver medallion made by Maripol for Madonna!

When she came on the Pop scene, Madonna was accompanied by her friend and jewelry designer, Maripol. Maripol has been credited by Madonna and others as having been the one to create the early grunge look that Madonna so amazingly perfected. This look was not only mimicked by millions of Madonna fans but also became an international fashion trend which can still be seen today.
