

TRIPLE JEOPARDY

Sexual Violence, HIV/AIDS and Female

This one day conference will explore current research needed to understand how sexual violence and HIV areas overlap. The conference offers the opportunity to network, build skills and develop action plans. It reminds us to defeat HIV/AIDS through unity, understanding, passion and leadership.

Violence and the fear of violence are contributing to HIV vulnerability among women in the Chicago area. This conference will explore the interplay between these factors and outcomes for women's holistic health and wellness. Sessions will highlight recent research, and prevention and treatment programs appropriate for survivors and women at risk. This event will bring together researchers, activists, policy makers and service providers working in the areas of violence and HIV.
